The Examiner acknowledges the amendment filed 3/31/08. Claims 1 and 3-9 are pending.

Claim Rejections - 35 USC § 103

Claims 1 and 3-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Pat. 4681423 in view of US Pat. Appl. 2003/0174355.

Referring to Fig. 5, 1:54-60 ("column:lines"), and 3:8-49, US'423 discloses a copier with a "first control processing" mode that initiates warm-up when placement of an original is detected.

US'423 does not disclose a "second control processing" mode that does not initiate a warm-up mode, but instead by a "copy operation instruction."

Referring to paragraphs [0067]-[0070], US'355 discloses a "second control processing" mode – facsimile - that deactivates a warm-up mode, and initiates a "copy operation instruction" – a "normal mode." It would have been obvious to adapt the second mode of US'355, which deactivates the warm-up mode, to conserve energy during an outgoing facsimile transmission, when image fusing is not required..

While US'423 does not explicitly disclose detection of transmission date (fax mode), fixing control based on previous processing data, automatic mode selection based on previous fax or copy usage, or a manual override, these do not patentably distinguish the claimed invention from the prior art. It would have been obvious to detect transmission date (fax mode) and implement an automatic mode selection based on previous fax or copy usage since fax is a conventional alternative mode of multifunction copiers, to fix control based on previous processing data since fixing history is conventionally used to determine heater operation, and to implement a manual override since such also is conventional where the automatic mode does not accommodate every contingency.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
